

# AIS Project

Currently, there are 1600 cryptocurrencies being traded in approximately 200 exchanges over 50 countries. The cryptocurrency market will continue to grow as the number of ICO proposals increases each year. However, some reports show that only 50% of these proposed ICOs were able to secure necessary funds. And, even for those ICOs fortunate enough to secure funding, 75% will be traded under the ICO price. As the cryptocurrency market continues to grow, the number of pitfalls will also increase.

The AIS Project will establish a cryptocurrency exchange in Mongolia and provide a native platform coin. It is well known that exchanges and wallets ICOs draw the most attention--reports from ICORATING show that the average ROI for exchanges and wallets sector was over 900%. That is just one of the reasons to focus on this ICO.

With the aid of the central bank in Mongolia, we will be establishing a cryptocurrency exchange in Mongolia following all the necessary protocols and regulations of the Mongolian government. Our team includes veterans from the foreign exchange/arbitrage market who have established over 10 different stock brokerage firms and foreign exchange firms in Asia. With the experience of running these exchanges, we hope to provide our users with the lowest exchange commission.

Also, we will be investing in double-mining project. Our exchange platform coin will provide the user with continual profit distribution.

## Exchange Features

### <Double Mining Project>

Mongolia is rich with resources

- Gold, Bronze, Coal, and Rare Metals e.g. Molybdenum
- Started preliminary negotiation with Sharyn Gol JS

Mongolia provides the perfect environment for cryptocurrency mining

- Average temperature in summer 19 degrees Celsius
- Cost of electricity is ½ of China
- Started preliminary negotiation with I-tools.

### <Affiliated Bank>

Business tie-ups with NI Bank will allow us to do the following:

- House the cryptocurrency exchange within the bank server system to realize maximum security
- Exchange cryptocurrency to legal tender
- Exchange legal tender to cryptocurrency
- Provide bank account and exclusive debit card for registered members

## AIS TOKEN DETAILS

Token type: TRC20

Token function:

1. Discount of exchange fee
2. Discount of withdrawal fee
3. Discount of listing fee
4. Pair Key Cryptocurrency
5. Division of Profits

- Division of Exchange Profits
- Division of Cryptocurrency Mining Profits
- Division of Resource Mining Profits

Token Allocation  
Total 2,300,000,000 coins
